

XM Instant Traffic & Weather is the main reason that I started subscribing to the service a month ago. My local FM stations did not have the information that I needed when I needed it. Their traffic information was always at least 30 minutes late. Too late to be useful for me. XM radio has traffic info that is there when I need it and I am willing to pay for that. If local broadcasters would provide accurate and timely traffic information, I would not have subscribed to XM radio. Please do not prevent XM radio from providing that service to me. Please reject NAB's petition 04-160. Thank you.
